*Reasons for Allowance*

The following is an examiner's statement of reasons for allowance:

Instant invention drawn to a method/system for managing storage which is logically divided into first and second storage heaps located at opposite ends of the linear portion of storage is allowable for including the following non-obvious improvement(s) over the prior art of record in conjunction with the remaining claim limitations:

Regarding claims 40-42 and 46-49:

wherein the first heap is reset to the same predetermined initial size at the start of each transaction, and the processor is structured to return an error condition when the second heap has expanded such that it is not possible to reset the first heap to its predetermined initial size.

Regarding claim 43:

the rate of expansion of the first heap into the unallocated region is slower once the first heap has passed the midpoint.

Regarding claim 44:

the second expansion policy is to expand into the unallocated region in order to satisfy a storage request until the midpoint is reached, whereupon the system preferentially performs a garbage collection to satisfy the request.

Regarding claim 45:

wherein the second expansion policy further includes trying to shrink the first heap to allow room to expand the second heap in order to satisfy a storage request

Regarding claims 50-69:

Art Unit: 2161

returning an error condition if the second heap has expanded such that it is not possible to reset the first heap to its predetermined size.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
